

Edimax nMax series got mark "Editor's choice"

PC Magazine Russia published testing of Wi Fi sets (router + adapter), working in 802.11n standard, in the November edition.

There were tested 10 sets of different producers, including Edimax new products from nMax series: router BR-6504n, PCI adapter EW-7728In and USB adapter EW-7718Un.

Edimax devices demonstrated **the best results**. And were awarded with «Editor's choice» mark for the impressive speed and optimal price\quality ratio.

To determine the winner all products were put to several tests. Among the assessment criterion were such important as installation and settings, speed, functionality, security, accompanying soft, documents quality and price.

During the testing were marked the simplicity of installation and settings of Edimax devices, clear wizards and accompanying soft, one of the best security assets. 4 tests were hold for speed checking: 2 in 802.11g standard and 2 in 802.11n standard. For every standard sets were tested at first in 1 meters and then in 10 meters from each other. In every case Edimax router and adapters demonstrated excellent results. Real speed in 802.11n standard is up to 100 mb\s.

Moreover it was noticed that Edimax devices are being sold for the most attractive price on the market.

The result confirmed that Edimax Technology provides goods of the highest quality and for reasonable price.
